PROJECTS

Hotel Microservice Project:

A scalable microservices-based hotel management system built with [Spring Boot](#), [Hibernate](#), and [MySQL](#). Implemented service discovery, [API Gateway](#), and inter-service communication for booking, user management, and hotel services.

Contact Manager Microservice:

Developed a contact management app with [CRUD](#) operations using [Spring Boot](#) and [MySQL](#).

GEN-AI Full Stack Web App:

Created a full-stack AI-integrated web application using [React.js](#), [Spring Boot](#), and [REST APIs](#).

JWT-Auth Application:

Implemented secure authentication and authorization using [JWT](#) and [Spring Security](#).

Blogging Application:

Developed a full-featured blogging platform with user roles, post management, and comment system using [Spring Boot](#) and [Hibernate](#).
